AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (original) A drive nut device comprising:
 - a drive nut body having a desired shape and further having two ends;
 - one end having a bore for mounting to a seat movement member;
 - and the other end having a drive nut formed as an integral part thereof, said drive nut having a threaded bore passing through the longitudinal axis of said drive nut.
2. (original) The drive nut device as claimed in Claim 1 wherein, said drive nut device is comprised of sheet steel.
3. (original) The drive nut device as claimed in Claim 2 wherein, said sheet steel is from about 0.5 mm to about 4.0 mm thick.
4. (original) The drive nut device as claimed in Claim 1 wherein, said drive nut having a longitudinal length suitable to prevent undesired non-longitudinal axis movement of said drive nut device.
5. (original) A vertical drive nut device comprising:
 - a drive nut body having a desired shape and further having two ends;
 - one end having a bore for mounting to a seat vertical movement member;
 - and the other end having a drive nut formed as an integral part thereof, said drive nut having a threaded bore passing through the longitudinal axis of said drive nut.
6. (original) The vertical drive nut device as claimed in Claim 5 wherein, said drive nut body has a generally L-shape.

Appl. No.: 10/604,934

7. (original) The vertical drive nut device as claimed in Claim 5 wherein, said vertical drive nut device is comprised of sheet steel.
8. (original) The vertical drive nut device as claimed in Claim 7 wherein, said sheet steel is from about 0.5 mm to about 4.0 mm thick.
9. (original) The vertical drive nut device as claimed in Claim 5 wherein, said drive nut longitudinal axis is substantially at a right angle to said bore for mounting to a seat vertical movement member.
10. (original) The vertical drive nut device as claimed in Claim 5 wherein, said drive nut having a longitudinal length suitable to prevent undesired non-longitudinal axis movement of said vertical drive nut device.
